Navigation Bar

Buttons (from left to right):
Back: go back to previous page. Default Me page and Friends list page do not have this button.
Display Picture of User: go back to Me page (user profile page).
Friends' List button: go to list of friends
Camera: QR Code Scanner (same as the one in Me page), allows faster access for users.
Search Button: search friends' profiles
Refresh Button: show notifications
Navigation Button: Help, Settings. (May have more later on)

**Me Page – Me tab**
Default main page.

Buttons:
NFC: transmit NFC stream
Scan: scan other users' QR Codes
QR Code: QR Code tab (current page)
Me: Me tab that shows a list of enabled services

Me Page – Me tab
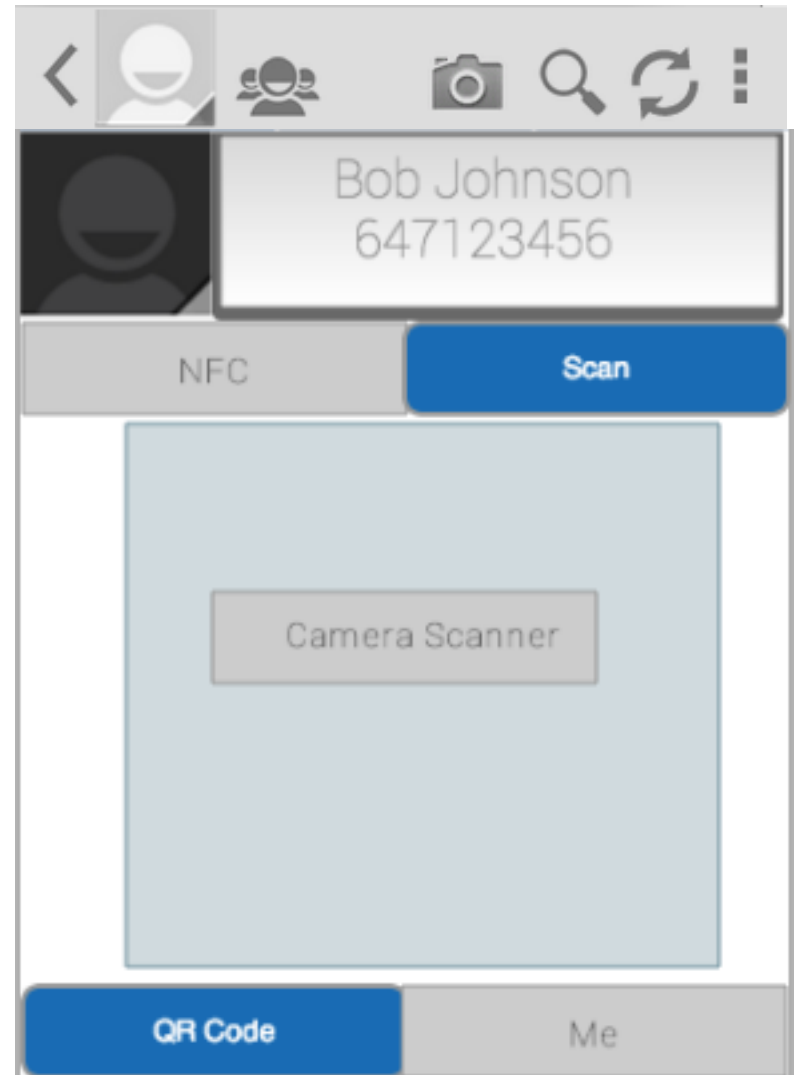

Enable Camera Scanner using the Scan button.

Buttons:

NFC: transmit NFC stream

Scan: scan other users' QR Codes

QR Code: QR Code tab (current page)

Me: Me tab that shows a list of enabled services

Me Page – Me tab
List out all the services that the user has enabled (logged in).

First time use: users need to click on the black/white icons to either grant accesses to existing services' apps or logged in to services.

Update: **broadcast** updates to all friends.

Friends List

List of friends ordered alphabetically with friends' names and display pictures.
Search bar: allows users to find friend's profile faster

Friend Page

- **Request**: request for services access to the friend (e.g. Chris), Chris would get a notification to remind him to give accesses to Bob in this case. Usually used when Bob first get Chris' contact.
- **Block**: Block requests from Chris by Bob
- **Chris (Friend's Name)**: services link to Chris' accounts that Bob have access to
- **Me**: Bob's services that Chris have access. Bob is able to give Chris more services' accesses from here. (cannot delete as per discussed)
